

Multiforce Contracts specialises in the fabrication of high quality stainless steel equipment for food processing and general industry. Our highly skilled workforce offers a comprehensive service from fabrication and supply to complete factory support.

We manufacture food grade quality conveyors in various materials. Our conveyors are specifically designed and manufactured to customers' requirements and to match site individual standards.

Conveyors

- PU belt conveyors
- Modular belt conveyors
- Stainless wire belt conveyors
- Gravity Roller conveyors
- Powered Roller conveyors
- Polycord conveyors

Fabrication materials

- Stainless steel – all grades
- Aluminium
- Mild steel
- Food grade plastics, inc HDPE and polycarbonate

Multiforce installations

- Industrial cookers
- Spiral ovens
- Industrial fryers
- Nitrogen tunnels
- Mixers
- Conveyor systems
- Slicers
- Spiral freezers

We manufacture a versatile range of food production accessories and custom-made products for industry, including belt conveyors, roller conveyors, ryno conveyors, with all the variations you would expect.

Our **experienced design team** will enable you to maximise the efficiency of any workspace.

Multiforce Contracts specialises in the fabrication of high quality stainless steel equipment for food processing and general industry. Our highly skilled workforce offers a comprehensive service from fabrication and supply to complete factory support.

We manufacture food grade quality conveyors in various materials. Our conveyors are specifically designed and manufactured to customers' requirements and to match site individual standards.

Specialised Equipment

- Reject conveyors
- Sterilising conveyors
- Straefing conveyors
- Spray units
- Shuttle conveyors
- Heater units

Fabrication materials

- Stainless steel – all grades
- Aluminium
- Mild steel
- Food grade plastics, inc HDPE and polycarbonate

Multiforce installations

- Industrial cookers
- Spiral ovens
- Industrial fryers
- Nitrogen tunnels
- Mixers
- Conveyor systems
- Slicers
- Spiral freezers

We manufacture a versatile range of specialised food production accessories and custom-made products for industry, including straefting conveyors, reject conveyors, steriliser conveyors, shuttle conveyors and more, with all the variations you would expect.

Our **experienced design team** will enable you to maximise the efficiency of any workspace.

Multiforce Contracts specialises in the fabrication of high quality stainless steel equipment for food processing and general industry. Our highly skilled workforce offers a comprehensive service from fabrication and supply to complete factory support.

We manufacture food grade quality products in various materials. Our lifting equipment is specifically designed and manufactured to customers' requirements and to match site individual standards.

Lifting Equipment

- Lift and tip
- Bin tipper
- Column hoist
- Reel lifter

Fabrication materials

- Stainless steel – all grades
- Aluminium
- Mild steel
- Food grade plastics, inc HDPE and polycarbonate

Multiforce installations

- Industrial cookers
- Spiral ovens
- Industrial fryers
- Nitrogen tunnels
- Mixers
- Conveyor systems
- Slicers
- Spiral freezers

The **column hoist** is an essential piece of equipment in the production environment.

Designed for **loads of between 200kg and 1000kg**, efficiency and low maintenance costs are an additional benefit of all our lifting equipment

The **reel lifter** eliminates heavy lifting, transferring a reel vertically from a pallet to its required horizontal position.

A choice of hand operated or battery power, combined with fixed or swivel castors, adds versatility to this robust range.

Our hydraulic or pneumatically operated **bin tippers** enable the operator to lift and tip the bin through **90 degrees** to wash down any dirt or left over product.

*These products have up to **3000kg lift capacity** and can be fully automated with electrical interfaces to other equipment.*

Our **experienced design team** will enable you to maximise the efficiency of any workspace.

Tel: 01493 600544 Fax: 01493 600520 Email: sales@multiforcecontracts.com Web: www.multiforcecontracts.com

Multiforce Contracts specialises in the fabrication of high quality stainless steel equipment for food processing and general industry. Our highly skilled workforce offers a comprehensive service from fabrication and supply to complete factory support.

We manufacture food grade quality fabrication in various materials. Our products are specifically designed and manufactured to customers' requirements and to match site individual standards.

General Fabrication

- Steps
- Platforms
- Trolleys
- Tanks
- Cabinets
- Barriers
- Safety guards
- Shelves
- Catchment trays

Fabrication materials

- Stainless steel – all grades
- Aluminium
- Mild steel
- Food grade plastics, inc HDPE and polycarbonate

Multiforce installations

- Industrial cookers
- Spiral ovens
- Industrial fryers
- Nitrogen tunnels
- Mixers
- Conveyor systems
- Slicers
- Spiral freezers

We manufacture a versatile range of food production accessories, from tables, cabinets through to custom-built workstations and custom-made products for industry.

Our **experienced design team** will enable you to maximise the efficiency of any workspace.

Our fabrication skills in **stainless steel, carbon steel and aluminium** are in demand across numerous industrial sectors, particularly those where practical engineering design and high skill levels are required.

Multiforce Contracts Limited, Unit 2-3, Shuttleworth Close, Harfreys Industrial Estate, Great Yarmouth, Norfolk NR31 0NQ

Tel: 01493 600544 Fax: 01493 600520 Email: sales@multiforcecontracts.com Web: www.multiforcecontracts.com

Multiforce Contracts have years of experience in the machining of precision engineering components, and our continual investment in the latest machinery and computer technology ensures we maintain our competitive edge.

We offer you a complete service – design, advice, prototyping through to high volume production and then delivery of fully traceable finished components. We work closely with our clients to develop ideas and products from inception to production.

Precision Engineering

- Milling
- Turning
- EDM wire cutting
- EDM spark eroding

Engineering materials

- Stainless steel – all grades
- Aluminium
- Mild steel
- Food grade plastics, inc HDPE and polycarbonate
- Brass
- Bronze

Our well equipped workshop houses:

- 2 x VF2 HAAS Vertical machining centre
- 2 x Bridgeport Vertical machining centre 600
- 1 x Bridgeport Vertical machining centre 560
- 1 x Colchester mascot 1600 lathe
- 1 x Agie agiesprint wire eroder
- 1 x Charmilles eleroda 420 spark eroder
- 1 x Jones & Shipman 540 surface grinder
- 1 x Bridge port I series manual mill with digital read out.
- 1 x Startrite vertical bandsaw
- 1 x Charmilles Sh2 CNC start hole driller
- 1 x Colchester student lathe

All materials machined, mild steel, stainless steel, plastic and aluminum.

We are specialists in the **precision manufacturing of Calibration Blocks** which are used in ultrasonic inspection processes in the oil and gas industries.
